Electrical Permit Application

All contractors are required to have a Georgia contractor's license and a business license from a Georgia municipality

A separate permit is required for each and every building structure or suite on which work is to be done. If building contains more than (1) dwelling unit, list the addresses of all units in which work will be done.

Expiration of Permits: All permits expire 6 months after the last required inspection that has been passed, or 6 months after the date of issue if no required inspections have been approved. The Building Official may issue a 6-month extension if any permit, (for due cause), if requested in writing by the permit holder prior to such a permit expiring.
